HEYNER MARÍN

Bogotá D.C., Colombia | +57 315 371 9580 | heyneryesid42@gmail.com | linkedin.com/in/heyner-marinr

FULLSTACK DEVELOPER

PROFESSIONAL PROFILE

Backend Developer with experience in building and maintaining web applications and REST API services, primarily using .NET (C#) and JavaScript (Node.js), supported by automation with Python. Strong skills in SQL (data modeling, queries, optimization), system integration, and production support. Focused on clean code, documentation, and best practices to deliver secure and scalable solutions.

KEY SKILLS

- Backend Development: .NET Framework / C#, Node.js; business logic design and data access layers.
- Web Services: REST APIs, error handling, validations, versioning, and technical documentation.
- Databases: SQL Server and PostgreSQL; familiarity with MySQL.
- Automation: Python (Playwright, Selenium).
- Quality: Code review, refactoring, Git, production support.
- Environment: Linux/WSL.

TECHNOLOGIES

C#, .NET Framework, Entity Framework, SQL Server, PostgreSQL, JavaScript, Node.js, REST APIs, Python, Playwright, Selenium, PyAutoGUI, Flask, React, Git, Power BI

WORK EXPERIENCE

Finanzauto — .NET Application Developer | Nov 2025 – Present | Bogotá (Hybrid)

- Development and maintenance of backend components in C#/.NET Framework for internal systems.
- Implementation of data access using Entity Framework and optimization of SQL Server queries
- Development and enhancement of services and endpoints for integration between modules (operational/accounting).
- Report automation and production incident support, prioritizing system stability and response times.
- Technical documentation and continuous code improvement following standards and best practices.

Boxmark Digital — Software Developer (Automatization) | Jul 2025 – Nov 2025

- Development of Python-based automations for web tasks, including error handling, retries, and logging.
- Implementation of bots using Playwright/Selenium for repetitive workflows (navigation, validation, and data extraction).
- Integration of automations with web services and data sources to support operational processes.

Globant S.A. — Analista de Datos Jr | Aug 2024 – Feb 2025

- Data analysis and preparation using SQL and Python to support business decision-making.

Dashboard development in Power BI and automation of recurring analytical tasks.

PROYECTOS RELEVANTES

- **APIs and Microservices:** Development of REST endpoints and backend utilities (Flask) for system integration and automation.
- **SQL Optimization:** Query and index tuning for reporting and accounting/operational modules.
- **Web Automation:** Playwright/Selenium workflows focused on validation and controlled execution.

EDUCACIÓN

Computer Engineering (In Progress) — ESEIT (2023 – 2026)

Web Development — Universidad de Caldas (2022)
